

**ANITA** 1212 D

The All Purpose Calculator with 17 EXTRA FEATURES

# ANITA

# 1212D

British made ANITA has been in daily use longer than any other electronic calculator. After 11 years of consistent progress, ANITA now appears in an important and exciting new form.

There is a tremendous advantage in being able to provide today's need for a calculator by supplying equipment which can, at no extra cost, be most likely to satisfy tomorrow's need as well.

Changes occur and Metrication and V.A.T. are examples of the increasing complexity of figurework in every office, and are typical samples of everyday business arithmetic for which ANITA 1212D has been specially designed.

The new benefits of multiple storage facilities, improved method and choice of rounding and special feature controls combine to give you greater speed in calculating over a wider range of applications than ever before, with even greater ease.

## 17 Special Features which make ANITA 1212D the best ALL PURPOSE DESK CALCULATOR

### EXTRA STORE FEATURES

- 1 2 free Accumulating Stores—can also hold Constants.
- 2 Separate Constant Memory.
- 3 Store contents can be freely manipulated.
- 4 Stores I and II can be added to, or subtracted from by direct entry or automatically on completion of calculations.
